Education

University of Central Florida — Orlando, FL
Bachelor of Science in Computer Science, GPA: 3.84 — *Expected May 2027*

Technical Skills

Programming Languages: Python, Java, C, C++, JavaScript, SQL
Frameworks & Libraries: PyTorch, React, Node.js, Express, Flask, NumPy, Pandas, Seaborn, PuLP, Matplotlib
Tools & Platforms: Git/GitHub, AWS, Docker, REST APIs, OpenAI APIs, GoHighLevel, Make, Odoo, Streamlit
Technical: Software Development, Testing & Quality Control, Data Analysis, Workflow Automation
Soft Skills: Agile Methodologies, Technical Communication, Problem-Solving, Cross-Functional Collaboration, Project Management
Languages: English (Fluent), Spanish (Native)

Experience

Dexter — Orlando, FL
Junior AI Solutions Developer — *June 2026 – Oct 2026*
- Developed full-stack web applications using React and Supabase, cutting manual data entry by 45%.
- Built secure asynchronous extraction pipelines with Edge Functions, reducing document latency by 60%.
- Implemented PostgreSQL RLS and RBAC policies, securing multi-tenant data with 100% isolation.

University of Central Florida — Orlando, FL
Teaching Assistant — *Aug. 2025 – Aug. 2026*
- Guided 100+ students weekly in labs, reinforcing recursion, graph algorithms, and data structure implementation.
- Debugged and explained complex Java programs during office hours, improving assignment completion and exam performance.
- Graded 1000+ coding submissions for correctness, runtime optimization, and adherence to documentation standards.

SimX AI — Orlando, FL
ML Engineer — *Jul. 2025 – Dec. 2025*
- Architected scalable automation pipelines integrating OpenAI models with CRM systems at production scale.
- Built context-aware conversational agents using prompt chaining to reduce hallucinations and improve accuracy.
- Increased lead-to-appointment conversion by 25% through optimized AI-driven customer interactions.
- Reduced manual processing latency by 70%+ via robust data orchestration and error-handling workflows.

Pactemos — Cartagena, Colombia
Software Engineer — *Dec. 2024 – Jan. 2025*
- Automated legal compliance by building reusable contract templates with dynamic placeholders in Odoo ERP.
- Standardized documentation workflows across 30+ branches, reducing processing delays and compliance errors.
- Supported daily operations for 100+ staff by improving reliability of internal document and approval systems.

Projects

ODDyssey | *Next.js, React, TypeScript, FastAPI, Python, Pydantic* — Sept. 2026
- Won 2nd Place in the Waymo Sponsored Track at ShellHacks 2026, developing the platform with a three-person team.
- Engineered a ranking pipeline combining 15 features to evaluate 20 U.S. metros across familiarity, infrastructure, and opportunity.
- Built a configurable 7-day fleet simulator modeling ride demand, wait times, charging behavior, empty miles, and gross revenue.
- Integrated Next.js and FastAPI through Pydantic models, powering interactive maps, city comparisons, and simulation playback.

AML Detection with Graph Neural Networks | *PyTorch Geometric, Python, GraphSAGE* — Feb. 2026
- Engineered a GraphSAGE pipeline using PyTorch Geometric to analyze 200k+ Bitcoin transactions.
- Achieved 67.2% recall on fraud detection by solving class imbalance via Weighted Cross-Entropy Loss.
- Leveraged 2-hop graph topology to identify complex structuring patterns missed by linear baselines.
- Validated model reliance on neighbor aggregation over raw metadata through feature importance analysis.

AI Document Assistant | *Python, Streamlit, RAG, BM25, Hugging Face* — Dec. 2025
- Built a production-grade RAG system enabling grounded Q&A over PDF documents up to 2000+ pages each.
- Implemented hybrid retrieval with dense embeddings, BM25 sparse search, and cross-encoder reranking.
- Added semantic chunking, alias-aware query expansion, and embedding caching to reduce latency by 35%.
- Deployed on Hugging Face Spaces using Streamlit with lazy model loading and secure secret management.

Leadership & Involvement

Theta Tau, Professional Engineering Fraternity — Orlando, FL
Active Member — *Nov. 2025 – Present*
- Contributed to service initiatives including campus cleanups and volunteer drives that reinforce leadership and teamwork.
- Participated in networking sessions with industry professionals to explore career paths across multiple engineering disciplines.

Tau Beta Pi, Engineering Honor Society — Orlando, FL
Member — *Nov. 2024 – Present*
- Initiated into Tau Beta Pi, the nation's oldest engineering honor society, recognizing the top 12.5% of engineering students.
- Guided candidates through initiation requirements, mentorship events, and professional development opportunities.
